PROJECTS

SPOTIFY CLONE

- Developed a fully functional Spotify clone using **HTML, CSS, and JavaScript**.
- The project features dynamic music **playback controls, playlist management, and search functionality**.
- Ensured a responsive design with an intuitive **UI/UX** for a seamless user experience.
- Integrated local storage to save user preferences and playlists. This highlights my front-end development skills and ability to create user-friendly applications.

HOSPITAL MANAGEMENT SYSTEM

- Designed and implemented a comprehensive Hospital Management System using **Java and SQL**.
- The system streamlined patient data management by allowing easy **addition** and **editing** of hospital rooms, managing patient and guest information, and **tracking** room occupancy.
- These features enhanced operational efficiency and improved data accuracy. This showcases my ability to develop effective and reliable management solutions.

CHAT APPLICATION

- Created a chat application using **Core Java**, featuring real-time messaging and user authentication.
- Developed a simple **console-based interface** that allows users to send and receive messages seamlessly.
- Focused on ensuring secure communication by implementing proper authentication methods.
- Emphasized an efficient and user-friendly experience throughout the development process. This highlights my proficiency in Java and ability to create practical communication tools.
